

## Alarm Clock v2: MODEL UPDATES

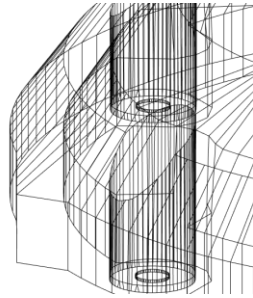

### Summary of changes:

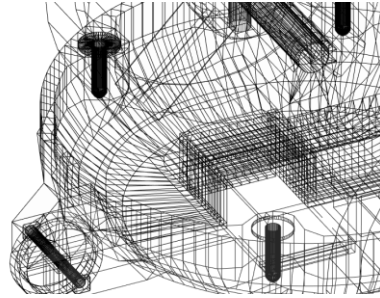

- Repositioned motor holders so, to add 4 ratchets to help clock move better
- Made ratchets.
- Small adjustments to battery container, so battery can be placed and removed easier.
- Added front wheel, which would reduce friction.
- Removed extra mass from sides. Shield is now around 2 times thinner than it was on first version.
- Strengthened screw places on top shield, so they would not break that easily
- Strengthened axel holders, so they would not break that easily.
